

Five Questions You Would Ask Someone in a Job interview?

- Tell me more about yourself?
- Why should we hire you?
- What are your weaknesses?
- Where do you see yourself in five years?
- What do you know about the company?

Would it be different questions if they were your instructor or the TA?

There would be different questions since I do know more about the instructor or TA. I would ask questions like why would they need this job. I would not ask "Tell me more about yourself" because I already know some parts about them.

What about in a casual conversation with a classmate?

The conversation would be completely different. I would not ask questions relating to questions on what their personality and how their work ethics are. Since I do know a lot about them. I would ask "What do you know about the company?"
